

## Environmental / Civil Engineering

Rogers & Callcott provides environmental and civil engineering consulting services to municipal, industrial, commercial, governmental, and private clients. Our cost-effective solutions include wastewater treatment design, infrastructure planning and design, and the preparation of all types of plans and specifications. Our technical and regulatory expertise also includes the design of gravity sewers, pump stations, water mains, storm sewers and stormwater systems.

### **Services**

#### **Planning**

- Studies for sizing utilities (water, wastewater and/or gas) to serve existing and newly developed areas
- Concept Studies and Reports
- Water and Wastewater Treatment System Evaluations
- Treatability Studies
- Preliminary Engineering Reports
- Construction Cost Estimates

#### **Permitting/Design/Construction (Water & Wastewater)**

- Design Plans and Specifications
- NPDES Permits
- Industrial Wastewater Discharge Permit
- Certified Erosion Prevention and Sediment Control Inspector (CEPSCI)
- Grant Application Assistance
- Contract Documents and Administration
- Bidding
- Construction Observation and Certification

#### **Regulatory Plans**

- Best Management Practices (BMPs)
- Stormwater Pollution Containment and Countermeasure (SPCC)
- Storm Water Pollution Prevention Plans
- SARA Notification
- Slug Control Plans
- Toxic Organics Management Plans
- Consolidation of Regulatory Plans

#### **Site Development**

- Permitting
- Road Design
- Storm Water Drainage Systems/Detention
- Utilities

#### **Natural Gas Systems**

- Distribution Piping
- Pressure Regulator Stations
- Meter Stations
